IATF 16949 Internal Auditor

Training Overview:

This 4-day IATF 16949:2016 Internal Auditor course equips participants with the knowledge, skills, and globally recognized credentials to audit automotive quality management systems effectively. Aligned with IATF 16949:2016 requirements and ISO 19011 auditing guidelines, this program blends classroom instruction, practical audit exercises, and industry-specific case studies to ensure participants develop auditing competence.

The Internal Auditor track focuses on conducting effective internal audits within an organization. The course emphasizes the financial benefits of effective auditing in the automotive industry, including reduced cost of poor quality (CoPQ), lower warranty claims, improved supplier performance, enhanced process efficiency, and increased customer satisfaction.
